

## MSEA SAFETY SEMINAR

June 13, 2017 - Kersey, CO

### Workers' Compensation & Claims Management

Brought to you by Sisk & Company and The Mountain States Energy Alliance (MSEA)

If everything went according to plan, you wouldn't need workers' compensation insurance. But unfortunately, accidents happen; are you informed and handling your work comp claims appropriately? Do you understand the correlation between management of your claims and your company's EMOD and TRIR?

Workers' comp insurance is there to protect employers and their injured workers by paying for medical expenses and a portion of lost wages when an employee is injured on the job. It's also designed to ensure that injured workers get the type of specialized care they need to get back to work healthy, safe and as quickly as possible.

Join the MSEA and Chanyn Bird, Sr. Claims Lead, for Pinnacle Assurance to discuss the claims management process and the basics of managing your claims.

We will discuss:

- reporting your injuries
- initial treatment
- return to work
- continued treatment and
- claims closure process

**Seating is limited, reserve your space soon!**
